To Whom It May Concern:

Re: Measles Immunity Requirement – Confirmation of Immunization Status

Wellington-Dufferin-Guelph Public Health has issued a directive to all congregate care settings, including Community Living Guelph Wellington (CLGW), in response to the number of measles cases across Ontario. This directive requires that every individual working in a congregate living organization regardless of their role or date of birth must have confirmed immunity to measles.

To comply with this directive all CLGW employees must provide proof of their measles immunization status. Acceptable forms of confirmation include:

- Documentation of two (2) doses of the MMR (measles, mumps, rubella) vaccine; or
- Laboratory evidence of immunity (serology); or
- A documented medical exemption, if applicable.

We are requesting your assistance in reviewing the immunization status of the individual presenting this letter and providing written documentation confirming on of the above. If a medical exemption is necessary, please include a brief explanation and any relevant supporting information.

Should you have any question or require additional information, you may contact Angela Korn, Resource Manager at the email or phone number listed below.

Sincerely,

Angela Korn
